

**NYLON/STEEL FIRE ESCAPE LADDER****MODEL EL52**

This nylon/steel Fire Escape Ladder is easy to use, and provides a reliable means of escape through a second floor window during a home fire.

**FEATURES AND BENEFITS**

- For use in two-story homes
- Strong nylon construction
- Fully assembled, ready to use
- Slip-resistant epoxy coated rungs
- Large hooks secure easily to windowsills
- Steel rung stabilizers on all rungs
- Ladder complies with the ASTM Standard F 2175-02. 375 lb. (170 kg) Ladder load rating
- Ladder is 14 feet (4.3 meters) in length.

**⚠ WARNING!**

- Read instructions for use immediately upon purchase.
- Close doors before opening any windows to prevent fire from being drawn into the room.
- Keep body close to ladder.
- Unless absolutely necessary, do not carry a child when using this ladder.
- Do not carry pets or miscellaneous objects when using this ladder.
- Instruct family members to use this portable escape ladder only when the primary escape path (that is, the main exit) is blocked or unsafe to use.
- This portable escape ladder is not a toy or recreational device. Instruct children that the ladder is to be used only in an emergency.
- For use only in windows that are structurally safe for the intended load.
- Not recommended for use with storm windows or other windows that do not open to the recommended minimum dimensions [20 inches (51 cm) wide and 32 inches (81 cm) high].
- Do not use above a 2 story height.
- Do not attempt to deploy the ladder from windows that are obstructed by furniture, radiators, air conditioning units, or security devices such as grilles or bars (without inside release mechanisms).
- Do not attempt to deploy the ladder into flames.
- Check for outside obstructions such as electric lines, telephone wires, or fences.
- Do not attempt to use the ladder if the windowsill does not meet the size range specified. The windowsill width should be between a minimum of 6 inches (15 cm) and a maximum of 10 inches (25 cm).
- Always plan and practice drills to ensure that occupants are familiar enough for proper use.
- This ladder is intended to supplement (not replace) the more important fire protection principles of fire drills, emergency evacuation plans, smoke alarms, fire extinguishers, etc.
- This ladder should be periodically inspected for damage, loosening of any items, or significant deterioration of the materials of construction.
- This ladder is designed for use by one person at a time.
- Store the ladder in a convenient location near the exit window; for example, under a bed, in a closet, etc.
